

To develop and strengthen our IT Department, we have an opening for a:

APPLICATION & DATA MANAGER

IBBL creates and manages collections of biological samples for research organizations investigating new treatments for diseases. The biobank collects, stores and analyses biological donor samples from various sources. Its activities will be supported by a complete software solution composed of several programmes linked together and connected to lab and storage equipment.

POSITION DESCRIPTION

You will ensure or participate to the implementation, configuration and validation of the solution in the test environment and then will take part in the setting in production of the complete solution, including creation of queries and reports, importing and exporting data and monitoring of future versions of the software according to the qualitative objectives of the Biobank. Our international work environment and human sized structure will allow you to find professional fulfilment.

Your main responsibilities will be to:

- Manage application and data (implementation, configuration, coding and harmonizing, reporting, biobank catalogue extraction & diffusion,...).
- Develop Office automation interface, queries and reporting tools and data quality control.
- Validate drafting test scripts, testing scenario for user acceptance test ...
- Assist the Functional Application Manager for user support and train users.
- Ensure documentation and traceability of all tasks; participate to the development of SOP's.

POSITION REQUIREMENTS

- Master in Data processing or graduated from Engineering School (with data-processing specialization).
- Min. 3 years' experience in a similar position. Good knowledge of database structures (Oracle, MySQL,...) and of SQL language, command of Windows Office programs and their development language and tools. An experience in Web development is required.
- Adaptability and ability to simultaneously approach data-processing problems, relation with users, drafting of documents and functional aspects of the activity. Team spirit with good personal organization and quality sense.
- Fluency in English and French is mandatory; any other language spoken in Luxembourg would be an asset.
- Methodical, autonomous and rigorous, you show dynamism and have excellent relational skills and abilities to listen and adapt. With good editorial competences, you have a creative and proactive mind in implementation of new ideas.

HOW TO APPLY?

Send us your application (cover letter and CV) under reference ADM-12 to: HR Department, IBBL, 6 rue Nicolas Ernest Barblé, L-1210 Luxembourg – or to job@ibbl.lu
