

IBBL BIOSERVICES
BIOBANKING

WHO ARE WE?

IBBL is an autonomous not-for-profit institute dedicated to service provision in the biomedical sector. As an ISO 9001 (general quality management) certified organisation compliant with the principles of ISO 17025 accreditation (competence of testing and calibration laboratories) and NF S96-900 certification (quality of biological resource centres)*, we offer a full range of bioservices to industry, academia and EU consortia.

In addition to our dedication to quality and our range of services, our location at the heart of Europe makes us an ideal partner for your clinical trials and research projects.

Our facilities offer human sample and data collection, logistics, processing, testing and storage services in Europe. Specialised in the optimisation and validation of sample handling methods, we provide methods, samples and data fit for your needs.

* More information available on www.ibbl.lu/about-ibbl/#quality

WHAT DO WE OFFER?

1

Collection Kits

- Design and production of customised barcoded sample collection kits
- Kit logistics and stock management

2

Sample Collection

- Collection of samples including blood, tissue, urine, saliva, CSF and stool from hospitals across Europe
- Management of logistic chain from point of collection to storage
- Prompt sample retrieval and distribution
- Temperature monitoring throughout transport

3

Sample Catalogue

- Range of human samples in inventory (blood, tissue, urine, saliva, CSF, stool and derivatives)
- Focus on cancer, diabetes, Parkinson's disease and healthy controls
- Extensive annotation with clinical data

WHAT DO WE OFFER?

4

Sample and Data Storage

- Sample storage for all sample types at a range of temperatures: controlled ambient, +4°C, -20°C, -80°C, -196°C (liquid nitrogen vapour)
- Long-term storage of archived samples
- Cryopreservation with controlled rate freezing
- Fully web-based eCRFs (electronic Case Report Forms) and LIMS (Laboratory Information Management System) validated for clinical trials

5

Project Management

Comprehensive management of all aspects of a research project, including preparation of study protocol, ethics committee submissions, budgets, strategic advice, progress reports, collaboration agreements, issue management and publications

WHY CHOOSE US?

✓ TO GUARANTEE THE SAFE STORAGE OF YOUR SAMPLES AND DATA

As a certified biobank we operate under a strict quality management system and all our sample logistics and storage activities are carried out by experienced staff following standard operating procedures. We are equipped with a 24/7 temperature monitor, alarm systems, back-up freezers and generators, ensuring your samples are never at risk.

✓ FOR COMPREHENSIVE LOGISTICS MANAGEMENT

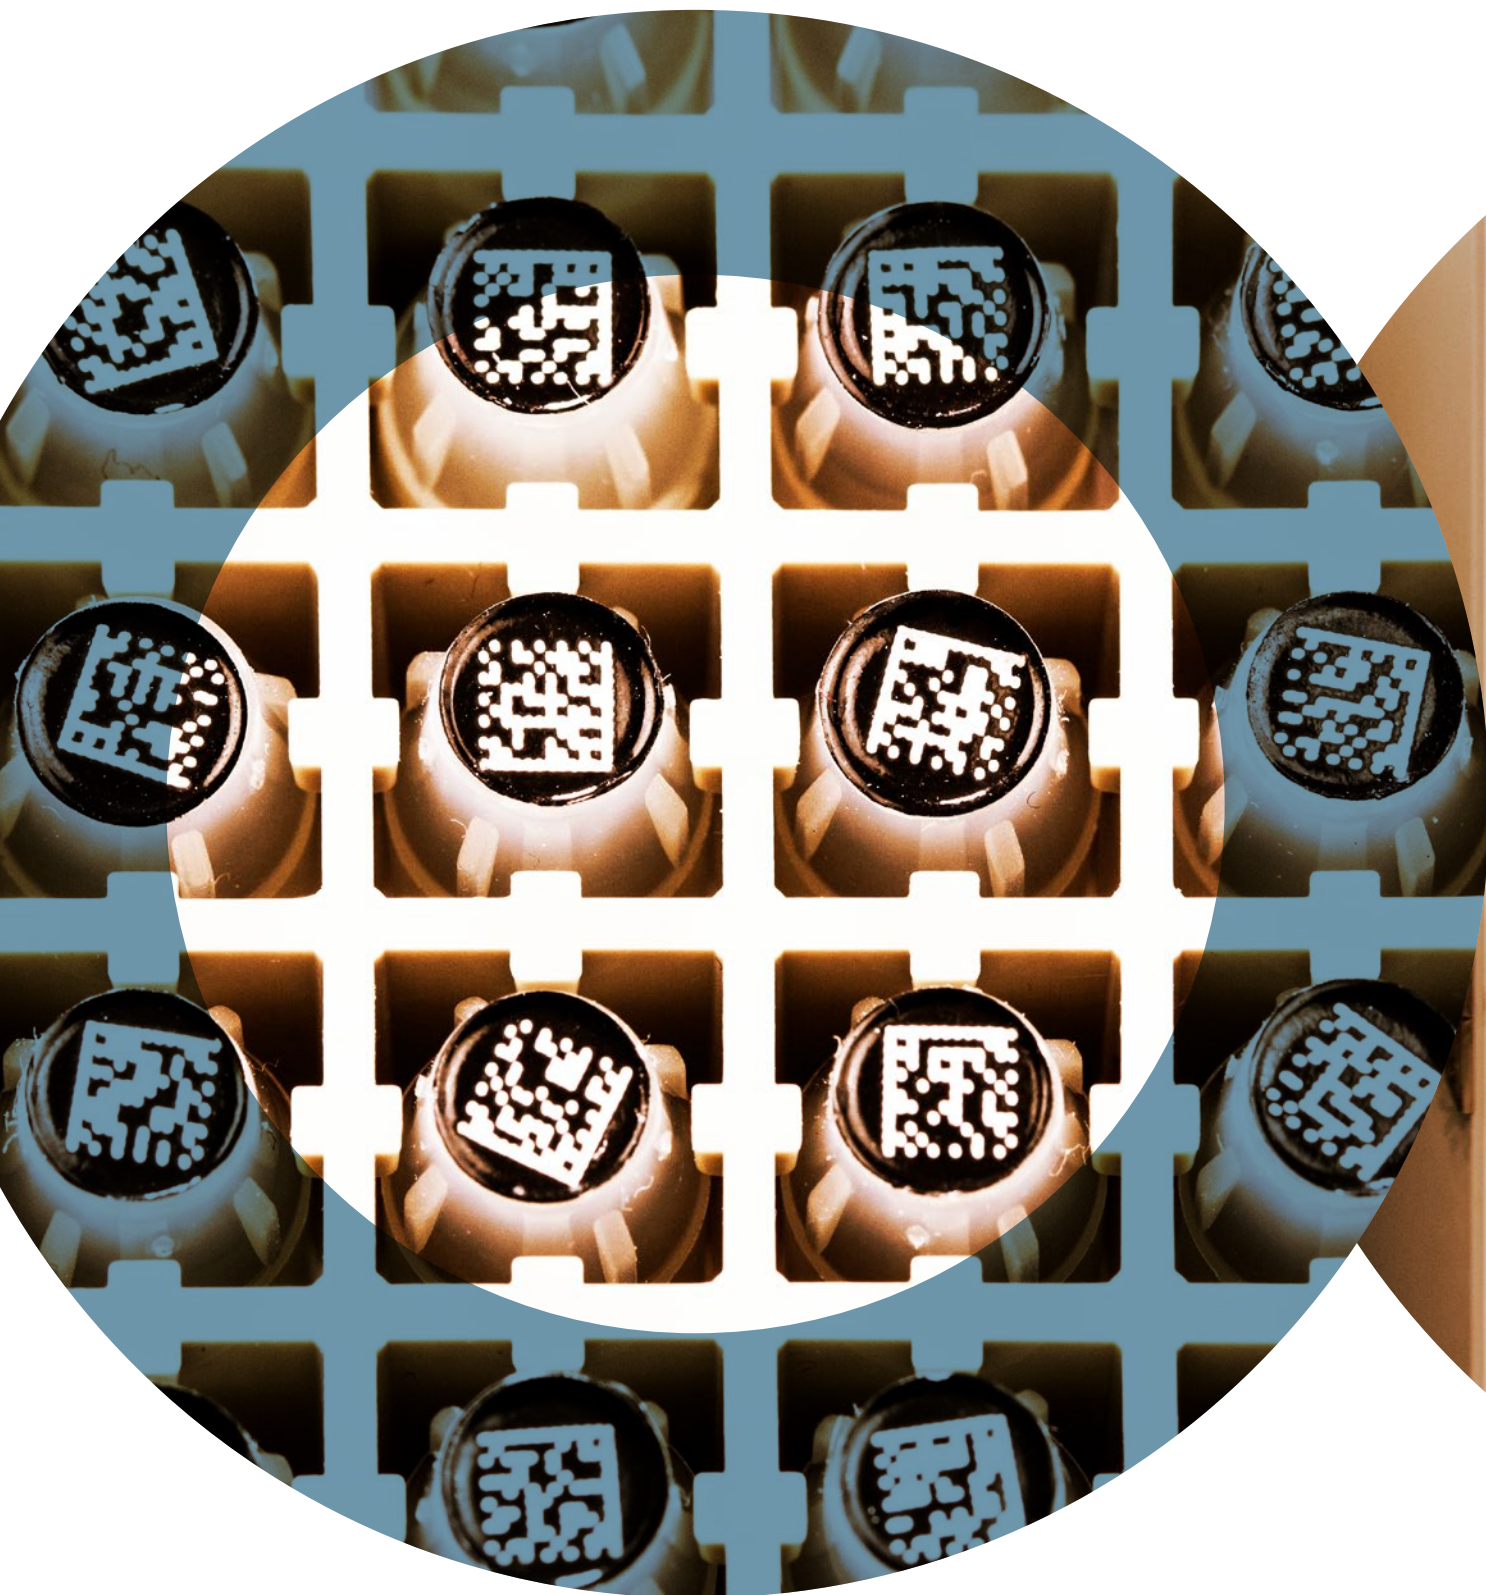

You will be supported by a dedicated project manager, who will make sure your project runs smoothly and efficiently. The project manager will adapt our biobanking services to your needs, oversee logistics from collection to redistribution and coordinate all project-related activities both internally and externally.

✓ FOR AN IDEAL LOCATION AT THE HEART OF EUROPE

Our location in Luxembourg is ideal for studies dealing with the collection and transport of samples from multiple sites. With our customized Laboratory Information Management System, we can ensure the prompt retrieval and distribution of your samples.

✓ FOR A COST EFFECTIVE SOLUTION

We are able to offer competitive pricing with special discounts for large volumes and long term contracts.
